

Guide on making your own reusable non-medical Face Mask

The following link demonstrates how to manufacture a selection of non-medical face coverings:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/diy-cloth-face-coverings.html>

Mrs Bell produced a few different samples following the instructions, sometimes using different materials and steps to accommodate what people might or might not have.

Mask 1

1. Folded fabric
2. Pleated
3. Ribbon or tape sewn down both sides

Mask 2 & 3 (*lining to accommodate filter and wire*)

1. Folded fabric
2. Both sides folded in and sewn down to create a channel
3. Ribbon or bias binding sewn at the top to create a holder for a wire/pipe cleaner
4. Thread cord, elastic or ribbon through side channels.

Mask 4 *NO SEWING necessary!!!*

1. Cut a t-shirt as guided from instructions on website

Mask 5 *Most complex design*

(*lining to contain filter and wire*)
